

## Heavy Duty Polyester Embroidery Thread

Heavy duty polyester embroidery thread consists of strong polyester continuous filament. Though rayon thread used to be the most popular embroidery thread, polyester thread has made large strides since it has been invented. Polyester is more strong, durable and colorfast than rayon. Therefore polyester embroidery thread works great for making up embroidery design on thick fabric, especially outdoor fabric, without abrading, breakage and color fading. What's more, it's still quite affordable and cost-effective as it has the unique advantages.
